

BLAZE[®]

OUTDOOR PRODUCTS

The Blaze Professional Portable Grill allows people to bring the power and quality of Blaze Grills on the road. The Professional Portable Grill utilizes all of the same commercial grade components of the Blaze Professional Series built-in grills. This portable powerhouse uses an 18,000 BTU cast stainless steel H-burner and 12 gauge stainless steel flame tamer to reach incredibly even heat. Pair that with a 12 mm stainless steel cooking grid and you have gorgeous sear marks on the go! The Blaze Professional Portable Grill is also offered in a Marine Grade model that features a 316L stainless steel body.
